JOB SHADOWING

ST. CLAIR COLLEGE

ROBOTICS JOB SHADOWING

INFORMATION FOR EMPLOYERS

St. Clair College is inviting local employers to join us to offer formalized Job Shadowing opportunities for our students in the **Electromechanical Engineering Technician – Robotics** program.

Job Shadowing provides an opportunity to promote job opportunities to students and consider potential hires, while offering students a chance to utilize new skills and training. Job Shadowing positions are unpaid and range from 20-37 hours in total during the semester. Upon approval, WSIB for student trainees is paid by the Government of Ontario, through the Ministry of Colleges and Universities (MCU).

RISE ABOVE THE ORDINARY

HOW IT WORKS:

St. Clair College Career Services and program faculty will promote your Job Shadowing opportunity to students, and coordinate resumes for interview selection.

Participating students will have skills in Robot Programming (ABB), Fluid Power, PLC Programming (Rockwell), Machine Vision (Cognex), ACAD, Project Management, Quality, and Shop Safety.

Once a student is chosen, Career Services can assist with determining a schedule that meets the needs of the employer and students.
