What Would Happen If the World Suddenly Went Vegetarian?

# How does your company rethink recycling?

*Andrea Descargar of Green City Plastics Inc. & Ecovana*

As the demand in production increases, so does the increase in costly disposal fees to haul plastics waste from many automotive manufacturers, and tool and mold companies. Most companies do not rethink recycling, and the next life cycle of their plastics waste.

Green City Plastics Inc. is a local plastic reprocessing company, developing zero waste initiative programs for local manufacturers. We provide cost effective plastic waste solutions, reprocess material at our facility, monthly data waste reports, and educate the companies on how to rethink recycling.

Rethink recycling with Green City Plastics Inc. Let our team help your company towards zero waste.

For more information, or to set up a plastics waste evaluation, please contact Andrea Descargar at:

andrea@greencityplastics.com or call (519)965-2874.

## What Has Automate Canada Done This Month?

- Visited Green City Plastics to find out more about there operations and tour the facility. Finding better ways to recycle industrial plastic wastes is critically important.
- Assisted in hosting Silvana Nawalany and students at IBLS. We are showing the students the trades in a positive light and the CAVE.
- Diane attended the Cybertech event in Tel Aviv Israel. And also the Tooling event in India, making connections for our industry.
- Setting up a Space Draw for CAMM and Automate Canadas Pavilion at NPE 2021.

For more information on any of these points or if you would like to be involved with potential future initiatives please email me at:

info@automatecanada.ca

## Design the Vehicle of the Future!

The WindsorEssex Economic Development Corporation (WE EDC) is developing a marketing campaign that communicates to the world that the Windsor-Essex Region is Canada's "Automobility" Capital.

To help kickstart WE EDC's marketing campaign, WE EDC is seeking community input by launching a **student contest to design the "vehicle of the future"**. The selected image will serve prominently in WE EDC's marketing campaign that will be featured at the 2020 North American International Auto Show in Detroit, Michigan.
